Profile

6+ years of experience. Looking for a passionate team building an interesting product!

Employment History

Full Stack Developer, EquipMe Now

Jan 2019 – Apr 2020 📍 Parnell, Auckland, New Zealand

With the goal to help teach young Kiwis personal finance skills, we built a learning platform from the ground up. We offer online learning modules and quizzes, and a booking system for coaching sessions. We also built a custom CMS to allow the course facilitators to modify their course.

Software Engineer, Plex Systems

Jul 2014 – Jun 2018 📍 Troy, Michigan, United States

Developed and maintained numerous MVC web applications for the manufacturing space. Spent my days writing new applications, adding features, and fixing bugs to deliver the best user experience and real-time reports for our customers' shipping departments.

Student Developer, Michigan State University

May 2012 – Jun 2014 📍 East Lansing, Michigan, United States

Worked for the department of Learning Design and Technology at Michigan State University. Developed and maintained various web applications for campus organizations and classes, to be used by faculty and students.

Software Engineer Intern, Plex Systems

May 2013 – Aug 2013 📍 Auburn Hills, Michigan, United States

Worked on a small team of interns to create a WYSIWYG editor for manufacturing and shipping labels. I was responsible for the front-end development and design of the project.

Education

Michigan State University, Computer Science & Engineering

Aug 2010 – May 2014 📍 East Lansing, Michigan, United States

- Computer Science & Engineering (major)
- Natural Sciences (minor)
- Entrepreneurship (certificate)
